

# PROTECTING THE JOINT FORCE

## We Are JPEO

The Joint Program Executive Office for Chemical, Biological, Radiological and Nuclear Defense (JPEO-CBRND) exists to manage our nation's investments in chemical, biological, radiological, and nuclear (CBRN) defense equipment. Having "Joint" in our title clarifies we support all Services. For example, we provide protective masks to the soldiers walking the streets of a battle torn country and also our Airmen flying in our skies. We also work closely with various government agencies that need CBRN defense equipment.

Our headquarters is located in Aberdeen Proving Ground, Edgewood Area, MD, but we have offices across the United States. There are three unique joint project management offices which manage the acquisition of CBRN equipment as enablers to achieving the National Security Strategy and supporting the U.S. Armed Forces as well as four joint project lead offices. As you scroll through this website you will gain a clearer understanding of our unique structure and the capabilities the programs. Please visit the "Who We Are" tab to learn more about the Joint Project Management Offices for CBRN Protection, CBRN Medical, and CBRN Sensors.

### Mission

Protect the Joint Force from weapons of mass destruction by generating affordable capabilities.

### Vision

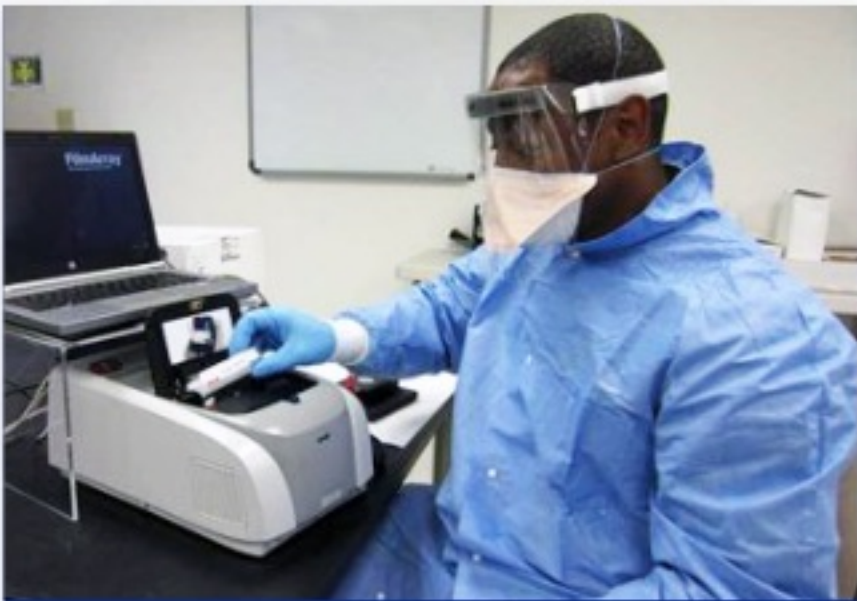

A resilient Joint Force enabled to fight and win unencumbered by a chemical, biological, radiological, or nuclear environment; championed by innovative, agile, results-oriented acquisition professionals.

## Featured Technologies

**Joint Service General Purpose Mask (JSGPM)**

## WORK WITH US

## Contracting Overview

The JPEO-CBRND's mission to provide the best CBRN technology and equipment – at the right place – at the right time – at the right cost is possible only with participation from one of our key partners, Industry. In support of the Joint Forces, Industry plays a vital role in supporting our Nation's Defense.

## Contracting Focus Areas

## Multiple Award Task Order Contract (MATOC)

MATOCs promote competition, save costs, encourage small business participation, minimize time to award and streamline documentation. The MATOCs are managed by the Omnibus Program Management Office; [click here](#) for contact information. And select below for information and opportunities in each contract area.

**Joint Enterprise – Omnibus Program Engineering and Technical Support (JE-OPETS)**

## Joint Enterprise – Contracted Logistics and Services Support (JE-CLaSS)

**Joint Enterprise – Research Development Acquisition  
Production/Procurement (JE-RDAP)**

## CONTACT

## Other Transaction Agreements (OTA)

OTAs are a very valuable tool to enable DoD to access technology that would otherwise not be possible. Request for Proposal – W911SR-17-R-0005 Aerosol and Vapor Chemical Agent Detector

Notice regarding Request for Proposal (RFP) W911SR-17-R-0005 An amendment to RFP W911SR-17-R-0005 for the Aerosol and Vapor Chemical Agent Detector (AVCAD) was posted on FedBizOpps.gov on 27 April 2018. The amendment adjusted the option quantities for production, amended the warranty clause and made other adjustments to the RFP. Final Proposal Revisions are currently due 17 May 2018. A 4th quarter award is anticipated.

## CONTACT

**JPM CBRN Medical TechWatch**

JPM CBRN Medical plays a vital role in enhancing the U.S. Department of Defense's strategy to prevent, diagnose and treat the effects of chemical, biological, radiological and nuclear (CBRN) threats and emerging infectious diseases. JPM CBRN Medical is instrumental in protecting civilian and military populations against injury and disease caused by naturally encountered infectious agents as well as intentional exposure related to CBRN warfare. Opportunities through a public-private partnership to help JPM CBRN Medical in the advanced development and acquisition of safe, effective and innovative medical solutions and systems to combat CBRN and other emerging infectious diseases.
